SUMMARY

3rd-year B.Tech Computer Science (Data Science) student at Punjab Engineering College with production-deployed AI infrastructure across two full-stack SaaS products. Proficient in Python, FastAPI, LLM pipelines (RAG, LlamaIndex, LangChain), and cloud-native deployment. Seeking SDE / SRE internships and campus placements.

TECHNICAL SKILLS

Languages: Python, JavaScript / TypeScript, SQL

Frameworks: FastAPI, Next.js, React, LlamaIndex, LangChain, Scikit-Learn

Cloud & DevOps: AWS (EC2, Boto3), Docker, Render, Vercel, GitHub Actions

Databases: PostgreSQL, Supabase, ChromaDB

AI / SRE: RAG pipelines, Prometheus, AlertManager, Statistical Anomaly Detection, JWT, Multi-tenancy, Chaos Engineering

PROJECTS

Sentinel-SRE — AI-Powered Incident RCA Platform [GitHub ↗](#)

Jan 2025 – Present

Python · FastAPI · Next.js · PostgreSQL · ChromaDB · LlamaIndex · Prometheus · Docker

- Architected a distributed incident analysis platform ingesting live Prometheus alerts; feedback-aware RAG pipeline auto-generates root-cause hypotheses, cutting mean triage time ~70%.
- Engineered non-blocking FastAPI endpoints with detached LLM inference threads, sustaining sub-200ms P99 latency under high-throughput alert bursts.
- Built a chaos simulator and service dependency graph to stress-test incident detection and visualise failure propagation across microservices.
- Implemented multi-tenant isolation, JWT auth, hashed webhook tokens, and rate-limiting; deployed on Render + Vercel with full CI/CD via GitHub Actions.

LexGuard AI — Enterprise DPDP Compliance SaaS [GitHub ↗](#)

Sep 2024 – Dec 2024

Next.js 14 · React · FastAPI · Supabase · LangChain · AWS EC2 · Docker

- Built a multi-tenant SaaS automating DPDP Act compliance audits; RAG pipeline (LangChain + Groq + Google GenAI) delivers clause-level risk flagging with tiered remediation steps.
- Designed Next.js 14 dashboard with live audit widget, Supabase auth, and role-based access control for enterprise-grade multi-tenancy.
- Containerised FastAPI backend on AWS EC2 with Docker; optimised frontend to achieve <1.5s LCP with lazy loading and server-side rendering.
- Integrated Google GenAI and Groq APIs for real-time legal document analysis, enabling automated clause extraction and risk scoring at scale.

EDUCATION

B.Tech — Computer Science Engineering (Data Science)

Aug 2023 – Jul 2027

Punjab Engineering College, Chandigarh

Relevant coursework: Data Structures & Algorithms, Database Management Systems, Machine Learning, Operating Systems, Computer Networks

ISC Class XII — 85%

2022 – 2023

St. Mark's School, Jhansi

ACHIEVEMENTS & LEADERSHIP

- American Express Campus Challenge 2025 (Product Track):** Cleared Round 2 nationally — applied product strategy, analytics, and go-to-market thinking.
- Joint Head, Spectrum (Art & Photography) Society & Discipline Committee, PEC — managed 100+ participant events end-to-end.
